

Aga Khan Award for Architecture

## Iran Project on 2019 Shortlist for Aga Khan Award for Architecture

### Master Jury to decide share of US\$ 1 million prize

**Tehran, Iran, 25 April 2019** – The **Enghelab Street Rehabilitation** in Tehran has been shortlisted for the 2019 Aga Khan Award for Architecture. The announcement was made by Farrokh Derakhshani, Director of the Award, in a ceremony in Kazan, Russia, today.

For information about the other 19 projects on the shortlist, please see [www.akdn.org/architecture](http://www.akdn.org/architecture) and the full on-line press kit, which includes briefs on each project and high-resolution images: [www.akdn.org/2019ArchitectureAward](http://www.akdn.org/2019ArchitectureAward).

The Aga Khan Award for Architecture is one of the oldest major awards in the field of architecture. It selects projects – from slum upgrading to high-rise “green” buildings – that not only exhibit architectural excellence but also improve the overall quality of life. The Award rewards architects, but also identifies municipalities, builders, clients, master artisans and engineers who have played important roles in the realization of a project.

“The **Enghelab Street Rehabilitation** favoured preservation over demolition,” said Farrokh Derakhshani, Director of the Award. “Owners were encouraged to collaborate with the Tehran Municipality in the renovation process and maintain their buildings thereafter.”

The **Enghelab Street Rehabilitation** project encompasses both the rehabilitation of the façades of 114 existing buildings – including 54 of particular interest – and the creation of a public cultural space between the national theatre and opera house. The project was developed through community consultations involving 1,000 invitations, 300 hours of meetings, 200 agreements and numerous plans and drawings. The rejuvenation of the façades has transformed the street’s appearance. Since it was completed, the scheme’s success in regenerating the district is evident in the establishment of nine new cafés, six restaurants, a bakery, two theatres and a boutique hotel.

The sites will now undergo a rigorous investigation by experts who visit and evaluate each project on-site. Their reports are the basis for the Master Jury’s selection of the eventual laureates. It should be noted that projects commissioned by the Aga Khan or any of the institutions of the Aga Khan Development Network (AKDN) are ineligible for the Award. To be eligible for consideration in the 2019 Award cycle, projects had to be completed between 1 January 2012 and 31 December 2017, and should have been in use for at least one year.

The Aga Khan Award for Architecture was established by the Aga Khan in 1977 to identify and encourage building concepts that successfully address the needs and aspirations of communities in which Muslims have a significant presence. The Award recognises examples of architectural excellence in the fields of contemporary design, social housing, community improvement and development, historic preservation, reuse and area conservation, as well as landscape design and

### **Notes**

The Aga Khan Award for Architecture is part of the Aga Khan Development Network (AKDN). It currently operates 1,000 or so programmes and institutions in 30 countries.. It employs approximately 80,000 people, the majority of whom are based in developing countries. The AKDN's annual budget for non-profit development activities is approximately US\$ 950 million. Its economic development arm, the Aga Khan Fund for Economic Development (AKFED), generates annual revenues of US\$ 4.3 billion, but all surpluses generated by its project companies are reinvested in further development activities, usually in fragile, remote or post-conflict regions.
